

OMI: Open Medical Inference Methods platform

A very short overview

What happens when Xenia wants that tool..

What happens when Xenia
wants 500 of such tools?!

Rationale

- Use of AI in healthcare will likely skyrocket (>500 FDA cleared apps available)
- Zoo of AI services → challenges to IT infrastructure and administration, leading to operational issues and high costs for rarely used AI models
- Solution: AI platforms (aka Marketplaces aka App Stores)
- Winner-take-all markets: Proprietary AI platforms in a fragmented market will lead to monopolies or oligopolies

Winner-take-all

POLICY / TECH / GOOGLE

Epic win: Jury decides Google has illegal monopoly in app store fight

Illustration by Cath Virginia / The Verge

/ The jury decided Google's sweetheart deals were too much.

By [Sean Hollister](#), a senior editor and founding member of The Verge who covers gadgets, games, and toys. He spent 15 years editing the likes of CNET, Gizmodo, and Engadget.

To prevent monopolistic dominance,
transparent and neutral rules for participation are essential
- including **open communication and data formats.**

GEFÖRDERT VOM

In other words

We need an **open protocol based** on **open standards**
for remote use of medical AI services that
allows **everyone to participate** and
thus create a **fair marketplace** for medical AI services.
